

## **AUM08 Automotive Manufacturing (revised)**

The AUM08 Automotive Manufacturing Training Package is the result of the first full review of the AUM00 Automotive Manufacturing Training Package which was endorsed on 6 August 2000.

The jobs and workplace functions covered by the AUM08 Automotive Manufacturing Training Package range from entry-level through to para - professional, and include entry level production, specialist production roles and technical post trade roles.

The review of the training package brought about changes that include:

- Deletion of 33 units of competency and 6 qualifications;
- Addition of new 18 units of competency and 4 new qualifications.

Further to this, all units were enhanced and employability skills were embedded in the qualifications and units.

At this stage, skill sets are still being reviewed and may be included as part of the continuous improvement process of the training package.

Industry-specific regulatory and licensing requirements are specified in the elements and performance criteria, range statement and evidence guide of the units. These include legislation, regulations, codes, guidelines and standards relating to manufacturing, workplace safety, environmental impact, quality assurance and other regulatory requirements. This advice is still current and has remained in the revised AUM08 Automotive Manufacturing Training Package.

Full support from industry and State Training Authorities has been received with all issues being addressed.

Members of the National Quality Council endorsed the revised AUM08 Automotive Manufacturing Training Package out of session on 19 September 2008. The Ministerial delegate approved the NQC endorsement decision on 6 October 2008.

The NSW Vocational Education and Training Accreditation (VETA) Board accredited the revised AUM08 Training Package qualifications at its meeting on 1 December 2008.

### **Qualification Outcomes:**
